

EURO-SEEDING® VEGESTAB

SUPPLIES

Fixing agent

PRODUCT DESCRIPTION

VEGESTAB is a **100% natural, water-soluble polymer** used in hydroseeding operations.

VEGESTAB contains dispersing agents that allow it to reach 70% of its bonding power within the first 10 minutes when placed in contact with water.

VEGESTAB is a **natural biodegradable** product.

USE GUIDELINES

VEGESTAB serves to lower runoff when applied to seeding operations that introduce the hydroseeding technique.

In addition to its bonding power, VEGESTAB features properties that place it in the category of an admixture; given these attributes, the user firm is able to raise its daily productivity thanks to the following:

- ▶ **Facilitating mix discharge** by acting like an actual lubricant,
- ▶ **Reducing mixing time** while guaranteeing a maximum colloidal effect.

PRESENTATION / SPECIFICATIONS

VEGESTAB has the appearance of a beige-colored powder. The product is extracted from selected plant species in the leguminous family (*cyamopsis tetragonoloba*)

Minimum characteristics on the raw product:

Carbon hydrate: ± 75%

Mineral matter: ± 5%

Water content: ± 20%

Water retention > 700%

Viscosity: 1,500 CP (Centi-Poise)

Bonding power: ± 2.0 Pas.Sec

CONCENTRATION*

Addition during the seeding operation phase: 25 to 75 kg/ha

** Average value, which requires adjustment depending on specific characteristics of both the site and other inputs contained in the seedlings – Contact us for further information.*

PACKAGING

A 25-kg double paper bag or a case of six 5-kg bags.
