

EASY Mulch

By Euro-Tec

PRODUCT DESCRIPTION

EASY Mulch is a blended matrix made from high-quality renewable and recycled vegetal fibres. This product allows for an easy instalment of low-maintenance vegetation on poor quality or depleted soils.

Apart from integrating binders and fluidizers that improve the mulch function, **EASY Mulch** also incorporates a fertilising agent of the newest generation (NFU 44-204) with direct action on the micro biotic soil system, through reinforcement of the root mass of the seeded plants. Thanks to its 100% bio origin and composition, **EASY Mulch** is apt for use in Biological Agriculture.

This product is produced in France, using local resources. The share of recycled fibre material makes re-use of already available resources possible, and therefore makes a responsible contribution to the protection of the environment.

EASY APPLICATION

The specifically developed formula, together with the presentation of the product in handy pellets, makes the application with smaller machines without mechanical agitation extremely easy.

COMPOSITION

Matrix of bio-sourced and recycled vegetal fibres, nutrients & biochar, swelling agent

Organic Material : 80%

Mineral Material : 20%

Humidity : 12% (+/-2%)

Water Retention Capacity to Dry Weight: 1000%
(following norm ASTM D7322)

Pellets : 0.5 to 20 mm

Application rate for 250 m² with a 700 Lt EASYSEEDER

4 bags of EASYMULCH
+ 1 Liter Vege-Max soil conditioner
+ 5 to 10 Kg seed mix per tankload

Packaging

10 Kg Kraftpaper bags
Pallet with 60 bags
